

## Trees of the Cherokee

Poplar

Hickory

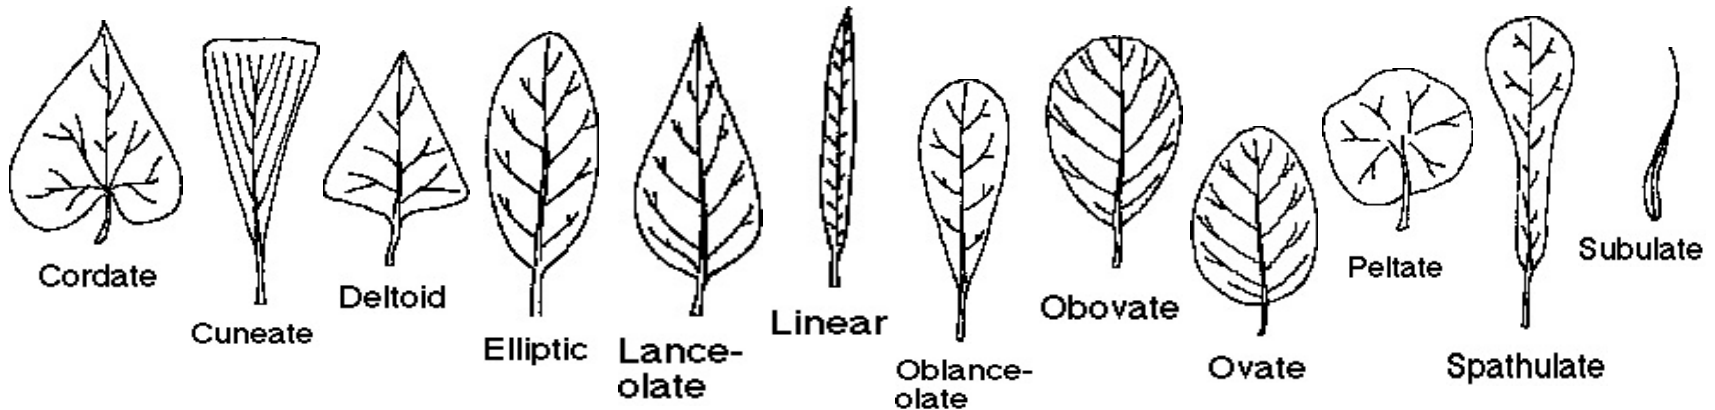

White Oak

Chestnut

Examine the four leaf types of the trees that the Cherokee found so useful. Leaf type is often the easiest way to identify most trees. Compare these leaves to the leaf types below. In the blanks provided, write the appropriate scientific leaf type under each of the four leaves above.

\***Extra Credit:** Go on a walk and collect five different types of leaves. Bring the leaves to you teacher with a list of the leaf types you collected.
